Fauna Local

Experience:

A 5-day immersion in the Pantanal, created for those who wish to experience and photograph up close the extraordinary wildlife of one of Brazil's most fascinating regions.

Throughout the expedition, we will travel along the Transpantaneira highway and its natural environments in search of all the local fauna species that make the Pantanal one of the greatest biodiversity sanctuaries on the planet.

The experience combines wildlife observation, land and boat expeditions, and photographic accompaniment, with time dedicated to searching for and photographing animals in their natural habitat.

A small group with a maximum of four participants and Patrícia Scalea as expedition and photography leader.

More than a trip, it will be five days of immersion, photography, and encounters with the wildlife of the Pantanal.

Jaguars, diverse birds, capybaras, caimans, giant otters, tapirs, deer, monkeys, and one of the greatest diversities of fauna in the world!!!

In the Pantanal we can observe jaguars, birds of various species, giant otters, toucans, caimans, capybaras, monkeys, deer, buffalo, anteaters, wolves, snakes and many other animal species!!!

It is one of the largest faunas in the world.
